Now With **5** Speeds =

The AS 250 Super has been designed according to your needs. It is now more powerful, more comfortable, more economical, more silent and more rapid. The AS 250 Super is now Super than ever.

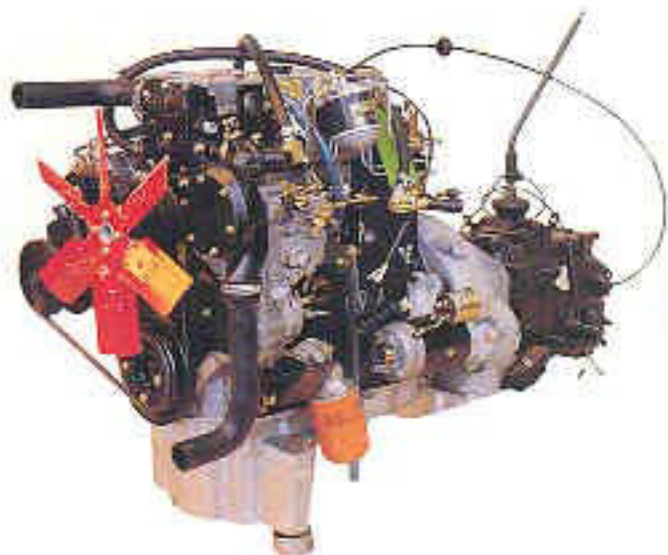

A S 2 5 0

A more powerful engine:

The unique high displacement and power of the unrivalled Perkins Phaser 90 engine enables the AS 250 Super to save more fuel, resist more under hard conditions, work more silently and respect more the environment.

A 5-speed transmission:

The AS 250 Super's new Spicer 5-speed transmission provides a 6% reduction of fuel consumption (equivalent to: approximately 1 lt/100 km).

Super = Just What You Wanted

S U P E R

A long-lasting rear axle:

Thanks to the hypoid rear axle design of its Spicer 60 rear axle, the AS 250 Super is more silent, more powerful and more long-lasting.

A very large fuel tank:

The AS 250 Super's fuel tank capacity has been increased from 60 to 95 lt., thus providing a longer travel time.

A more comfortable driver cab:

Not only have the cab dimensions been increased, allowing for more spaciousness, but the use of the Pilot-Granner driver seat has put recent driver comfort at the top of priorities.

A wider angle of vision:

The driver's angle of vision has been expanded by increasing the height of the windscreen and side windows.
